User Problem	FitBuddy Solution
Generic fitness advice does not match individual inputs	User-specific seven-day plan based on age, weight, goal and intensity
Planning a week manually is time-consuming	AI generates a complete weekly routine
User needs change after seeing the plan	Natural-language feedback produces a revised plan
Previous version can be lost during editing	Original plan is retained separately
AI service may be unavailable	Model fallbacks, retry handling and mock mode
Users want integration options	HTML application and JSON API
Saved plans need retrieval	SQLite persistence and result/admin views
